I'm attaching 3 zip files with excel documents. Hopefully the titles will tell you what they are. I suggest you look at SurveyResponses_All and SurveyIndividual_All files first. These files should provide you with the data you are looking for. Let me know if you need anything else.

John,

Looking at he link, I can't seem to get a breakdown of the number or percentage of respondents by zip but rather just a list of zip codes represented by respondents. Is it possible to get a breakdown ?

Bill Gibbons
Executive Director
Public Safety Institute
